PROFESSIONAL SUMMARY

E-Commerce Virtual Assistant and WordPress Web Developer with a Computer Engineering background and proven hands-on experience managing Shopify stores, building client-ready portfolios, and delivering documented SOPs. Adaptable across e-commerce operations, general VA, and web development roles. Additional capabilities include video editing (CapCut), 3D modeling (Blender, SolidWorks), and graphic design (Canva). DOST-SEI National Scholar — Top 6.56% of nationwide applicants — demonstrating fast, independent skill acquisition and high attention to detail. Fluent in English with clear, professional async communication.

CORE SERVICES

- E-Commerce Store Management — Shopify (products, variants, collections, discount codes, refunds, orders, inventory), Amazon Seller Central (listings, inventory, order management), WooCommerce
- Customer Support Operations — Refund and return handling, complaint de-escalation, custom reply templates, helpdesk tools (Zendesk, Gorgias)
- WordPress Web Development — Site setup, theme customization, plugin management, WooCommerce integration, page building
- General VA and Admin Support — Google Workspace (Drive, Gmail, Calendar, Docs, Sheets), Microsoft Office (Excel, PowerPoint), calendar and email management, data entry, reporting
- Creative Services — Canva (graphics and product images), CapCut (video editing), Blender (3D modeling), SolidWorks (3D CAD modeling)
- Data and Reporting — Google Sheets formulas and filters, inventory trackers with reorder alerts, stock-level dashboards, pivot tables

TOOLS AND PLATFORMS

E-Commerce Platforms (Primary Niche): Shopify | Amazon Seller Central | WooCommerce | WordPress | TikTok Shop (in progress)

Productivity and Workspace: Google Drive | Gmail | Google Calendar | Google Docs | Google Sheets | Microsoft Excel | Microsoft PowerPoint | Zoom

Customer Support and Project Management: Zendesk | Gorgias | Trello | Slack | Meta Business Suite | Notion

Creative and Design: Canva | CapCut | Blender | SolidWorks

PORTFOLIO SAMPLES

The following sample projects were self-built to demonstrate real platform competency. All are labeled as sample projects and available for review upon request.

- Shopify Sample Store — Built a fully functional demo store with 10 products, complete with variants, collections, discount codes, and backend admin dashboard screenshots
- Before and After Product Listing — Rewrote a live weak product listing with both versions shown side-by-side to demonstrate copywriting and optimization skill
- Mock Inventory Tracker — Google Sheet with stock-level formulas, reorder alert logic, and low-stock flagging, ready to deploy immediately
- Customer Support Reply Templates — 5 professional templates covering: refund request, shipping delay complaint, wrong item received, general inquiry, and 5-star review request

- Daily Order Fulfillment SOP — Standard Operating Procedure document covering pick-pack-ship workflow, status update protocols, and escalation paths

EXPERIENCE

Student Assistant | Culture and Arts Office, CHMSU | 2024 – 2026

- Maintained internal documentation, scheduling, and calendar coordination across multiple departments
- Tracked and verified eligibility records and program roster data — high-accuracy, detail-oriented administrative work
- Handled inter-department communications and administrative task routing

IT Technician and Network Troubleshooter | Family-Owned Computer Shop | Ongoing

- Maintained client databases, daily operational logs, and service records for 50+ devices
- Managed DNS, DHCP configuration, and network setups for small business clients
- Provided client-facing remote support and communication — direct analog to VA workflow

Freelance Technical Contractor | Multiple Universities | 2023 – Present

- Managed 6+ independent client projects end-to-end: scoping, delivery, and documentation
- Communicated directly with clients across asynchronous channels and met all deadlines independently
- Completed all commissions without direct supervision — demonstrating reliability and self-direction

Network and Cloud Engineering Intern | Ubiquity | 2026

- Administered MySQL databases and supported production-to-staging data migrations
- Maintained system configuration documentation and handover records
- Coordinated across network, cloud, and IT teams in a fast-paced enterprise environment

EDUCATION

Bachelor of Science in Computer Engineering (2022 – Present)

Carlos Hilado Memorial State University (CHMSU), Philippines

- DOST-SEI Scholar (JLSS) — Top 6.56% nationally on the qualifying exam, validating fast adoption of new skills and independent learning
- CHED CSP Scholar
- 3rd Place — ICEP C++ Programming Competition, Northern Iloilo Region

CERTIFICATIONS

- Google IT Support Professional Certificate
- Shopify Academy — Navigating the Shopify Admin
- Shopify Academy — Managing Inventory in the Shopify Admin
- Google AI Essentials — in progress
- Google Advanced Data Analytics — planned

KEY STRENGTHS

- Rapid Tool Adoption — Top 6.56% national scholar with a proven track record of mastering new platforms independently within days
- Detail-Oriented Execution — Engineering background demands precision; the same standard is applied to every administrative and client task

- Clear Async Communication — Fluent written English, no fluff, specific replies, comfortable with Slack, email, and async project management
- Tech-Forward Advantage — Computer Engineering training enables deeper understanding of store backends, APIs, and data systems compared to typical VAs
- Creative Versatility — Video editing, 3D modeling, and graphic design capabilities are rare value-adds for product-focused e-commerce brands
