PROFESSIONAL SUMMARY

Computer Engineering student and DOST-SEI national scholar (top 6.56%) working as a multi-niche Virtual Assistant across e-commerce operations, social media management, AI automation, and funnel building & SEO. Builds real, working systems fast — from a demo Shopify store to a self-hosted n8n automation and a live 3-funnel Systeme.io sales sequence — rather than just describing skills on paper. Background spans enterprise networking, AWS cloud administration, and Python/REST API development, giving a technical edge most entry-level VA applicants don't bring: comfortable troubleshooting tools independently, documenting repeatable processes, and picking up new software within a day. Consistently rated for fast learning under pressure, adaptability across unfamiliar tools, and finishing work that is immediately usable, not just "in progress."

WHY I'M A DIFFERENT KIND OF ENTRY-LEVEL VA

- **Proof over promises:** four working portfolio sites with real, functioning deliverables per niche — not a generic "I can learn anything" claim.
- **Technical foundation most VAs don't have:** Python, SQL, REST APIs, AWS cloud, and enterprise networking — directly useful for automation, store back-ends, and troubleshooting client tools without waiting on support.
- **Documented fast-learning track record:** DOST-SEI national scholar (top 6.56%) and a habit of shipping a usable result in a new tool within 24–48 hours.
- **Already client-tested:** 6+ independent freelance commissions and IT support for 50+ client devices, both requiring scoping, deadlines, and asynchronous client communication — the exact muscle remote VA work needs.
- **Multilingual:** Fluent in English, Tagalog, and Hiligaynon; actively learning German for future EU-market client work.

CORE SKILLS & KEYWORDS

E-Commerce Operations: Shopify Store Management & Optimization, Amazon Seller Central, WooCommerce, WordPress Updates, Order Fulfillment, Inventory Management, Product Listing Copywriting, Data Entry, Zendesk, Gorgias

Social Media Management: Content Calendars, Client Onboarding Systems, Meta Business Suite, Content Scheduling, Analytics & Monthly Reporting, Notion, Canva, CapCut

AI Automation Specialist: n8n (self-hosted), Make.com, Zapier, Workflow Automation, Lead Routing & CRM Integration, AI-Assisted Inbox Triage, Claude/GPT API Integration, REST APIs

Funnel Building & SEO: Systeme.io, Lead-Magnet Funnels, Email Nurture Sequences, Sales Page Builds, On-Page SEO, Google Search Console, A/B Testing

Technical Foundation: Python, SQL, MySQL Administration, Flask/REST APIs, AWS (EC2, EBS, S3, VPC), Linux, Networking (DNS/DHCP/VLANs), Git/GitHub

Admin & Productivity: Google Workspace, Microsoft Office, Calendar & Email Management, Asynchronous Communication, CRM Data Management, Zoom

PORTFOLIO — PROOF OF WORK BY NICHE

- **E-Commerce Operations:** live demo Shopify store (10 products, variants, collections, discounts), before/after product listing rewrite, mock inventory tracker with reorder-alert formulas, 9-scenario customer service email template library, daily fulfillment SOP.
- **Social Media Management:** full client-hub system — welcome packet, client tracker, content calendar, monthly analytics report template, service-tier proposal, and strategy guide.
- **AI Automation Specialist:** five self-hosted n8n workflows covering lead capture-to-CRM, AI email triage, form-to-PDF reporting, auto cross-posting, and AI-drafted customer replies with human approval.
- **Funnel Building & SEO:** complete 3-funnel Systeme.io system (lead magnet, 5-email nurture sequence, mock-offer sales page) plus an on-page SEO checklist and Search Console setup.

RELEVANT EXPERIENCE

Network & Cloud Engineering Intern | Ubiquity

2026

- Administered MySQL databases and led production-to-staging data migrations — the same precision and change-tracking discipline required for store and client data management.
- Managed AWS EC2 instances, EBS storage, and S3 backups; configured VPC segmentation — direct experience with the cloud tools many automation and web-based VA workflows run on.
- Documented system configurations and handover records for cross-functional teams, translating directly into clear async client reporting and SOP writing.

Freelance Technical Contractor | Multiple Universities

2023 – Present

- Managed 6+ independent client projects end-to-end — scoping, delivery, documentation — communicating exclusively through asynchronous channels and meeting every deadline without direct supervision.
- Demonstrated the self-directed accountability and client-communication habits that remote VA work depends on, before ever holding a VA title.

IT Technician & Network Troubleshooter | Family-Owned Computer Shop

Ongoing

- Delivered technical support for 50+ client devices, maintaining service logs and databases with high attention to detail.
- Provided remote client support through asynchronous communication, effectively simulating real-world VA and customer-support workflows.

Student Assistant | Culture and Arts Office, CHMSU

2024 – 2026

- Performed data entry and maintained scheduling, calendars, and internal documentation across multiple departments.
- Tracked and verified eligibility and program-roster records with high accuracy, ensuring full institutional compliance.

EDUCATION

Bachelor of Science in Computer Engineering — Carlos Hilado Memorial State University (CHMSU), Philippines | 2022 – Present

CERTIFICATIONS

- Google IT Support Professional Certificate
- Shopify Academy — Navigating the Shopify Admin
- Shopify Academy — Managing Inventory in the Shopify Admin
- Google AI Essentials — In Progress
- Google Advanced Data Analytics — Planned

AWARDS

- DOST-SEI National Scholar — Top 6.56% Nationally (JLSS Qualifying Exam)
- CHED CMSP Scholar
- 3rd Place — ICPEP C++ Programming Competition, Northern Iloilo Region

LANGUAGES

English (Fluent — primary working language) | Tagalog (Fluent) | Hiligaynon (Native) | German (Learning — targeting EU-market client work)
